PROJECT TECHNOLOGY ASSESSMENT

Goal:

1. Place a check mark next to each home amenity of interest.

HOME TECHNOLOGY ASSOCIATION

2. Return this form to us for a technology consultation and tailored proposal.

Timing: As early as possible. As early as the schematic design phase for architects and designers; and before getting framing, electrical, and HVAC bids for builders.

Benefits:

- 1. We can create design drawings for design / aesthetic collaboration with the design and build team.
- 2. Early design collaboration significantly minimizes or eliminates costly change

orders that will disrupt the project's completion time. Plus, de will eliminate aesthetic and performance compromises that h technologies are considered too late.	0	customer service/aftercare, and industry reputation. Learn more at htacertified.org.									
Infrastructure / Tech. Foundation Prewire (at minimum to include network, TV locations, security, surveillance cameras, music locations.
